

Quaker Meetings Network Brochure for the US

1 Background

Similar to the FGC Quaker Cloud, Quaker Meetings Network provides a centralised website system for Quaker meetings. Here is our back story:

In 2017, a Quaker Website Project Group (QWPG) was formed to address the widely needed effort to improve websites of Quaker Meetings in the UK. It was identified that many meetings were running websites that (a) appeared dated in the modern age of the internet; (b) did not perform well on mobile or tablet devices; (c) were established (and perhaps maintained) by one technically minded Friend but lacked contingency for if/when this Friend moved on or passed on the role to someone less abled.

Separately from this initiative, Britain Yearly Meeting (BYM) offers an information page about each Quaker meeting on their website following the templated path <https://quaker.org.uk/meetings/name>, but this page is controlled by BYM and not editable by the individual Quaker meetings themselves. If information on these pages requires updating, meetings must email updates@quaker.org.uk who will then manually process the data.

The QWPG, which by 2018 had grown to over 70 Friends from around the UK, discussed various options with BYM including expanding the existing BYM resource, or BYM providing funding for a separate system for centralised website support for meetings. Unfortunately, BYM discerned that they were unable to coordinate the project or provided centralised funding.

From this decision was born the Quaker Meetings Network (QMN), a partnership enterprise between two developers who were prepared to build a system to satisfy the needs of the QWPG with the outlook that the costs associated with building and running the system will be funded by meetings themselves through annual fees. One of these freelancers is a website developer and consultant who has built and actively maintains five websites for Britain Yearly Meeting.

Britain Yearly Meeting is fully aware of and are supportive of Quaker Meetings Network but has chosen to not be involved with the program. They have provided information on our network in the Clerks mailing list and have directed meetings to us via Quaker Life. QMN has been designed and developed for longevity. We have contingency plans in place for circumstances should the developers cease to be involved in the project.

As of October 2023, our membership includes over **170 Quaker Meetings** in the UK (over 50% of meetings in the UK) and over **10 Quaker groups** and recognised bodies.

In September 2023 we learned that the FGC Quaker Cloud would be closing down. We had some interest from Monthly Meetings in the US as to whether our system could welcome them. We believe QMN would work well for Friends in the US. We are therefore setting us a Pilot Program and offering a free trial of our systems until at least March 2024 to enable meetings to see if they would like to join us.

2 Separating outreach and administration

Since the launch of our network in late 2019, we quickly learned that some meetings used their website for administrative tasks such as storing minutes and documents or housing a private members-only area. We recognised that many meetings also needed a space for its internal activities, but also that this space should be separate from the outreach website of the meeting.

QMN has thus grown to support meetings in two distinct areas:

1. An **outreach website**, for publicising your meeting, its activities/events, and welcoming newcomers.
2. A **private intranet**, a space for internal affairs, facilitating discussions and connections between Friends online, and assisting in administration

This document has been written for Friends of all technical backgrounds. At times we might define terms and phrases for those less familiar with technical systems.

For those unfamiliar with the term **intranet** it means:

a place for sharing information, collaboration tools, operational systems, and discussions within an organization, usually to the exclusion of access by those outside of the immediate community

3 Outreach Websites

Feature	Description
A beautiful, modern, and responsive website	Modern websites need to look good on devices of any size. With desktops, laptops, tablets, and mobiles available in all shapes and sizes, it's challenging to ensure your site looks good to everyone. QMN websites are designed to modern standards and are fully responsive to any sized screen. We use professional, licensed web fonts, so our size looks great no matter who visits you. Our sites meet the same high levels of accessibility as giant corporate websites like Google, Wikipedia, as well as Britain Yearly Meeting. The appearance of our sites is maintained actively by our developers, and frequently minorly tweaked to ensure our sites look the best they can.
Editing webpages is straightforward and fun	QMN websites are customisable and are built using our bespoke custom page builder that is intuitive, easy and fun to use for Friends of all technical backgrounds.
SSL certified for high security	Websites now need to run over Secure Sockets Layer (SSL). You can tell if a website has SSL as you'll see a padlock symbol in the address bar

	<p>(sometimes coloured green). SSL is now so ubiquitous that modern web browsers will actually say a website is “not secure” if it doesn’t have SSL. We’ve found that the majority of Quaker Meeting websites do not have SSL. This looks very unprofessional and is a potential deterrent for outreach. Some web hosts charge extra for an SSL certificate. QMN provides SSL certificates at no additional fee for all of our websites.</p>
<p>Strong security and frequent backups</p>	<p>Our network has incredibly high levels of security to safeguard from bad things happening. We monitor the entire network traffic daily to detect for security issues, and have not had a single security breach since our launch. We create automatic daily backups of the entire network, and keep long-term weekly and monthly backups, so you can rest assured everything is safe and archived.</p>
<p>Utmost privacy protection</p>	<p>We uphold you and your websites visitors at the highest levels of privacy. We do not use any kinds of cookies on QMN websites for public visitors, so we do not have to annoy them with cookie banners. We do not use third-party analytics services, and we don’t sell any of our data to third parties.</p>
<p>Maintenance and updates included</p>	<p>We maintain the network by updating the software that powers our community when updates are released. This is handled for you with no input needed from your website administrator(s). All updates and maintenance to our websites is included in the annual fee so you can be sure there won’t be any surprise charges.</p>
<p>Centralised support</p>	<p>The responsibility to care for your website can change hands frequently as knowledgeable Friends move on to other responsibilities. QMN support is centralised, providing a constant point of support no matter whose job it is to maintain the website. We have a large and ever-growing library of support articles on using our network. Know that we are always there if you run into troubles.</p>
<p>Control your Meeting data</p>	<p>QMN maintains a database of Quaker Meetings information (address, location, meeting times, etc.) that we use to run our own <i>Find a Meeting</i> search engine and your QMN website. By joining QMN, your meeting will directly control all this data and can update it across the entire network at the click of a button.</p>
<p>High quality maps and geolocating</p>	<p>We use a responsive, high quality map interface powered by Google Maps (cookieless) to help enquirers find your meeting. On our search engine, visitors can find nearby meetings too, on an interactive map. We</p>

	also support what3words to help people pinpoint the exact location of your meeting.
Search Engine Optimisation (SEO)	SEO is crucial for ensuring that your website appears towards the top of internet search engines like Google and Bing. Managing SEO can be a handful, but QMN websites handle all of it for you, automatically.
Quakerly stock photos	We have a large and growing library of professional Quaker stock photos to aid you in building your website.
Ethical hosting	The entire Quaker Meetings Network is run on 100% green energy powered servers. We also donate monthly to the National Trust's <i>Plant a Tree</i> fund to further reduce the carbon footprint of our online network. Our network is infinitely scalable, ensuring your website will be lightning fast even if we're running hundreds of websites (which we now are!!).
Unlimited bandwidth	There are no limits to the traffic of your website.
Plenty of storage for your images	We provide a generous amount of disk space for storage images to use on your website.

3.3 Domains, URLs, Web Addresses

3.3.1 Definitions

To aid with this section, we summarise briefly some definitions for unfamiliar Friends.

Domain

An identifier that points to your own private space on the internet

Example: the two primary domains of QMN are **quakermeeting.org** and **quaker.app**

Subdomain

A subsection of a domain that is treated completely uniquely from the parent domain

Example: Wandsworth meeting's subdomain on the QMN network is

wandsworth.quakermeeting.org

URL (also Web Address)

A reference to a web resource that specifies its location. For most websites, it incorporates a protocol (i.e. https://) followed by a domain.

Example: the URL of Wandsworth's website is **https://wandsworth.quakermeeting.org**

Note, most web browsers will automatically use the protocol best suited to each website, so you'd only need enter "wandsworth.quakermeeting.org" into your web browser to find the website.

3.3.2 Architecture of QMN URLs

QMN provides websites to Monthly Meetings at subdomains of **quakermeeting.org**.

This means the URL or Web Address of *Example Quaker Meeting* would be found at **https://example.quakermeeting.org/**

Note that this is a "talking URL" – if you say it out loud it literally sounds like "Example Quaker Meeting"

Note that subdomains are treated as entirely separate websites to our primary domain. Your website will be treated uniquely in term of search engines and content management. It is your way to have your own public space as part of our wider network.

3.3.3 Using a Custom Domain

Many meetings already own their own custom domain or would prefer to use a custom URL. For example, Hampstead Quaker Meeting owns their own custom domain **hampsteadquakers.org.uk**. Thus, they have chosen to run their QMN website at: **https://hampsteadquakers.org.uk/**

However, if you were to visit their "natural" QMN address (**https://hampstead.quakermeeting.org**), you would be seamlessly redirected to their custom web address.

Owning and running your own domain carries associated costs. These are not significant but nonetheless is something your meeting needs to consider when deciding where they want their site to be found online.

We have had meetings (a) use their own domains; (b) keep their custom domains but switch to the QMN website address and point their custom domain to simply redirect to their new QMN website address; (c) lay down their custom domain when they switch to QMN.

Managing the ownership and administration of domains is a technical task and one that can be challenging to the non-specialist. QMN offers domain services that can manage all the aspects of your domain(s) for you for a small annual fee, allowing you to centralise this responsibility with technical experts.

3.4 Email Accounts

An attractive resource for meetings is the ability to run centralised, role-based email accounts that are linked to your website, such as clerk@, treasurer@, lettings@, warden@, etc. This enables improved record keeping, and when the roles change hands, the mailbox login can simply be handed to (or reset by) the new Friend, cutting out any administration of circulating the personal email account of the new Friend. To run

email accounts on QMN, we do require your meeting to run your own custom domain (see section 3.3.3) as we do not provide email accounts at subdomains of *quakermeeting.org*.

4 Intranet

The epicentre of the Quaker Meetings Network is our network “hub”, a website called **Quaker.app**. The URL of this website is:

<https://quaker.app>

For those unfamiliar, the domain **.app** works exactly the same as **.com** or **.org**

.app is a generic top-level domain (gTLD) created in 2018 for websites dedicated to performing an application or service and .app websites have an added benefit that they only operate over SSL encryption, ensuring high levels of security at all times.

Please do not confuse our .app website with the apps that you get on mobile phones/tablets!

Quaker.app is a closed space. It is only available to users with individual accounts, and Friends can only create accounts by being invited to join using an *invitation link*. Each meeting or group has its own unique intranet and its own unique *invitation link*, and it is up to your meeting to decide how widely to share the invitation link.

Controlling access to the intranet is a core concept. You can opt to approve all connection requests to your intranet, and you can control exactly which areas of your intranet each member can access. This is important for limiting access to potentially sensitive information/resources.

Every meeting or group who joins QMN will automatically get an intranet on Quaker.app which acts as the “hub” for all the activity of that meeting or group on QMN. You can tailor which tools are active on your intranet based on the services you need.

4.1 Features of Quaker.app

Feature	Description
Private intranet	A private space for your meeting which can only be accessed by those who (a) know the invitation link (b) create a personal user account on Quaker.app (c) are approved to join your intranet, if you enable connection approvals.

Notice board	A digital notice board for your intranet. The notice board is the “homepage” of your intranet and includes a list of events in your intranet’s calendar for the current month.
Discussion forum	A space within your intranet to hold online discussions in an open forum-style setting. Our forums are simple and straightforward so any Friend can interact with them.
Document storage	A secure place to store your documents and minutes. Our storage is scalable, so you only pay for what you need. Files and folders can be shared using unique links that have the option to be password protected. If you update your documents frequently, our system allows you to upload new versions of documents without needing to update any metadata or sharing links. Documents can be protected to ensure they cannot be deleted (e.g. useful for master lists etc.).
Event calendar	Your intranet event calendar is the place to promote upcoming events. Public events in your calendar are used all over QMN to promote your events, including on your outreach website. You can also list events as “private” and these are only displayed on your intranet calendar.
Email accounts	Quaker.app is the place you administer your meeting’s email accounts, request new accounts, and keep track of disk usage. You can also download instructions for installing your email account on your computer or mobile/tablet device.
Domain management	If you use QMN’s domain management services, you will be able to see your domain(s) listed in Quaker.app and check all their settings and pending renewal dates.
Billing	In our Billing area, your treasurer can easily keep track of current and upcoming service charges and see historical payment information.
User management	The person, or small group of people, who are ultimately responsible for looking after your intranet are called the intranet administrator(s). These people can view and access everything on your intranet, but importantly can manage the users of your intranet. They can grant/revoke access to certain areas for certain users, and approve and/or remove users from the intranet.

Subgroups	Subgroups can be created within your intranet as a private space for close groups like committees. Subgroups have their own membership managed by a single convenor, and they have their own discussion forum, calendar, and document storage.
Support Center	Quaker.app has a large support center. We have written manuals on all of our services which guide you through using them using screenshots. Administrators can access our Support Tickets system if you need to contact the QMN support team directly for 1-2-1 assistance.

5 *Joining our Pilot Program*

To join the Quaker Meetings Network, use our online registration system at <https://quaker.app/register>. US Monthly Meetings can register for a free trial of our systems until March 2024. During this program, our system will be expanded properly to the US (this development work will take some time to complete).

6 *Service Charges*

In October we published the first version of this document with proposed US pricing. On 13 November 2023 we re-issued this document with our **final pricing** (bolded below).

6.1 *Annual Plan*

	US Full Site
Annual Fee	\$149
Public outreach website	Multi-page Full Site
Intranet on Quaker.app	✓
Intranet user limit	Unlimited
Notice board	✓
Event calendar	✓
Access to support center	✓
Discussion forum	✓
Document storage	✓
Subgroups	✓
Email mailboxes	✓
Usable by Local Meetings	✓
Usable by Area Meetings	✓
Usable by Quaker groups	✓

6.2 Domains

You have the option of centralising the management of your domain(s) with QMN. We presently support the following domains: **.org**, **.org.uk**, **.org**, **.com**. Support for other domain types can be considered on a case by case basis.

Our Domain Fee is **\$20** per year. The first fee is payable when we onboard your domain to our network, which covers any purchasing or renewal cost, and administration involving installing your QMN website at your domain and migrating any existing email accounts. The Domain Fee is then payable each year at the same time as your Annual Plan, and covers all administration & management, and the annual renewal of the domain with the registrar.

If, once we onboard your domain, a renewal fee is not payable for some time (for example, if when you purchased your domain, you paid for more than 1 year upfront), then the Domain Fee is reduced to £5 per year until a renewal fee is payable, to cover administration & management.

If you are transferring a domain to QMN, in the interim we will provide a temporary subdomain for you to use to build your QMN website so that you can begin to build your website prior to transferring your domain to us.

6.3 Disk Space

As part of your annual plan, you receive 500 MB of disk space on your outreach website for images and a limited number of files. You also receive 250 MB of disk space on your intranet for document storage. You further receive 1GB (1000 MB) of disk space for email accounts (note you need your own custom domain to use email accounts).

Additional disk space above the included quota is available at a flat rate of **2¢** per MB per year. This may be available pay-as-you-go or as upgradable bundles.

6.4 Email Accounts

If you have your own custom domain, you can use 5 email mailboxes as part of your annual plan. If your meeting requires additional accounts, further accounts can be provided for **\$3** per account per year. Note that purchasing additional accounts does not raise your disk space.

If you already have email mailboxes with your custom domain and wish to migrate them to QMN, we will migrate your email for free as part of the domain transfer administration.

If your meeting uses an external mail service, such as Google Workspaces (formally GSuite) or Microsoft 365, you can continue to use these services when you move your website/domain to QMN.

Testimonials

“

What a difference being part of the Quakers Meetings Network has been to our Meeting.

We have found the Quaker.app ideal as an Intranet for communication within the Meeting. The Calendar helps people keep in touch and involved with Meetings and Events that are being organised, with the venues and Zoom links kept up-to-date. Relevant documents for the Meeting such as Notices, Agendas and Minutes of Meetings are easily accessible for everyone who has registered with the Quaker.app.

We have a Website, for outward facing communication on the Internet. The feature that allows Public Events and Meetings created on the Intranet to automatically feed in to the Website is a real asset and keeps the Website up-to-date.

The ease of constructing and editing the Website means we no longer need technical expertise within the Meeting - anyone comfortable with a computer can create an elegant, attractive Website which has a uniform appearance with other Quaker Meeting websites.

The support that QMN gives is first class. They are always so helpful and responsive in a very timely way. We feel we can relax that we are in the hands of a very professional organisation with innovative ideas, but also an understanding of the help needed for non-technical users.

Janet, Chichester Meeting

“

I've used two platforms previously for creating and maintaining a Quaker meeting website. What's so attractive about the QMN platform is that it's purpose-made for Quaker meetings (so almost anything you'd want to say about your meeting can be fitted under one of the standard page tabs) and anyone with a passing knowledge of Microsoft Word can get to grips with it in a few hours (so once set up the responsibility for maintaining the website can pass easily from one person to another, or be shared).

Graham, New Earswick Meeting

“

From an administrator of a Quaker group for which QMN has transformed our old moribund website into new life, QMN are:

- Young, cool and very able
- Able to explain - even to old Friends - the ways of the Digital Planet on which they live, move, etc

- Able to create excellent Support stuff to empower Friends to work in such new, creative dimensions in the Quaker App & QMN Support
- Able to be very, very patient guiding idiots naive newcomers through the complexities of their creations
- Able to create well considered new structures that are seemingly fit for purpose
- Able to listen to problems, not all of their own making, and fix solutions
- Able to offer choices and adapt to circumstances

David, Quaker Values in Education Group (QVinE)

“

There have been many benefits from moving to QMN. We have a modern looking website which is easily edited and kept up to date. Associated payments are transparent and easily managed. Service from QMN has been very responsive and patient to the needs of the only just techie. This support has removed much of the anxiety of managing the website. But for us, perhaps the biggest benefit has been that it has brought together as a team Friends who work on the various local meeting websites in the Area Meeting. We have met together and been able to support each other. Thank you QMN for all the time, effort and understanding that goes into making this happen for us.

Adrienne, Worcestershire & Shropshire Meeting

“

I first found out about QMN when they reached out to our Meeting through our existing Website. Our Meeting had been thinking about ways we could bring all of our Meeting websites under one umbrella and, after reading their brochure, QMN seemed a good place to investigate to see if what they offer met with our needs.

I decided to do some research and reached out first to Wandsworth Meeting who were already members of QMN and, through them, was connected with Keith who is one of the people who helped bring QMN to life in the first place. His enthusiasm was infectious, and he helped me understand what we would need to do to make the QMN work for us.

QMN was very helpful in explaining in non-technical terms how and what I would need to do to re-build our meeting website. I have been looking after the running of the Brant Broughton QM website for about 4 years now and so I do have an understanding of how to manipulate a website and keep it up to date.

I found the QMN template very easy to understand and use and, in fact, I had repopulated it with 90% of the information from our current website before I had discovered the really excellent video that QMN have created that takes newcomers through how it works, step-by-step. It did

not take anything like as long to do as I had anticipated as the QMN template was well laid out and easy to use.

There are so many things I love so far about how QMN works. Built by Quakers, for Quakers is perhaps one of the most outstanding aspects of their group to recommend them. They understand what Friends need from so many angles and they especially understand the needs of Quaker Meetings who may or may not have someone as experienced as I am now in their meeting to build and run a website. The QMN can help with all aspects of that. Please understand, I am a musician, not a computer geek! With the sort of ready laid out templates that QMN provide, it is easy enough to build your website to reflect your meeting with no knowledge of how the nuts and bolts of it all work in the background.

I would say, if you are worried about this aspect of re-building your website or creating a website for the first time for you meeting, reach out to the community of QMN and the newly formed QECN or others who have used the QMN services to find out what is required. It is so different speaking with a Friend about websites than it is speaking with a company who build websites with no knowledge of Quaker values or needs.

Cynthia, Brant Broughton Meeting

“

Quaker.app is a brilliant piece of kit and the QMN website is just right. Editing and creating are just so easy-peasy. It shows up so well in google. We've had 5 enquiries to join the MfW. Never had that with our old site.

But there is an issue: I'm convinced the quaker.app calendar would really benefit if everyone in the meeting or at least the postholders or even all the convenors would use it to post their events. So far, that's not happened in our Mtg!

Anthony, Loughborough Meeting

“

As a small meeting it is very helpful to have such a professional looking online presence. Many of our neighbouring meetings also opted for a site which means there is a consistent look across the local area and potentially nationally as well. It does mean that one of us has to be reasonably confident in accessing and editing the site but help and guidance is always available in the online support centre of QMN. During the covid period we have needed to update our 'covid message' several times which was a relatively straightforward experience.

Mona, Esher Meeting

“

If you have never built/created a website, QMN is for you. Shortly after QMN started I offered to create a new website for Leicester Meeting.

If you have ever noticed the brickwork of old houses, builders created patterns with their bricks. That's what you do with the QMN platform, only QMN call their bricks "sections" and these sections come in different selectable forms. Once one has grasped the simple fact that QMN allows you to build your website just like old builders build houses, it does become very simple.

The adventurous part of the system comes in "manipulating" the sections to create the look of your website and you have the freedom to be very creative.

The adventurous part is also getting Meeting Friends involved helping with the text and to supply the photos, especially the photos; and the system gives you many options for what you can do with them.

I hope from the above you will gather it has been fun putting together the Leicester website, but it has not always been plain sailing and QMN have always been there as my safety net, thank goodness.

Mike, Leicester Meeting

“

Winchmore Hill Quakers used a website set up at the time of our fundraising appeal. It required a level of technical skill and commitment, and had capabilities we did not need, We needed something simpler, and quick to set up. Quaker Meetings Network were fast and friendly, enabling us to establish us a straightforward site which did what we needed. We're very happy.

Stephen, Winchmore Hill Meeting

7 List of Communities on the Quaker Meetings Network

The following section lists all communities who are in some capacity part of QMN as of 13 November 2023. Most have websites, some are not yet launched, and some may be in the progress of migrating to us.

7.1 UK Local Meetings, equivalent to US Monthly Meetings (144)

Acomb, Alderney, Alford, Alton, Andover, Ashburton, Ashford & Folkestone, Bailrigg, Barnstaple, Basingstoke, Beverley, Bideford, Birkenhead, Blackburn, Bognor Regis, Bolton, Boston, Brant Broughton, Brentford and Isleworth, Bridgwater, Brighton, Broadstairs, Bromley, Bude, Bull Street, Bunhill Fields, Canterbury, Chester, Chichester, Chorley, Clitheroe, Colchester, Come-to-Good, Crawshawbooth, Croydon, Deal, Esher, Ettington, Exeter, Exmouth, Falmouth, Farnham, Faversham, Finchley, Friargate, Friends House, Gainsborough, Garstang, Godalming, Golders Green, Grimsby, Guernsey, Guildford, Hammersmith, Hampstead, Harrogate, Headington, Heswall, Horsham, Hull, Hythe, Ilminster, Isle of Wight, Jersey, Keighley, Kettering, Kingsbridge, Kingston, Kirkbymoorside, Lancaster, Leicester, Lincoln, Liskeard, Littlehampton, Loughborough, Maidstone, Malton, Marazion, Marlborough & District, Marsden, Milford Haven, Minehead, Muswell Hill, Nailsworth, New Barnet, New Earswick, Newark, Newport, Newton Abbot, Northampton, Oakham, Okehampton, Penzance, Petersfield Quaker Worship Group, Pickering, Plymouth, Polmont, Poole, Portsmouth, Preston, Reigate, Richmond-upon-Thames, Rochester, Romford, Rugby, Scarborough, Settle, Sevenoaks, Sheffield Nether Edge, Shrewsbury, Sidmouth, Skipton, Southampton, Spalding, Spiceland, St Austell, Stansted, Stoke Newington, Streatham & Brixton, Swanage, Swarthmoor, Taunton, Tavistock, Telford, Thirsk, Tonbridge, Torbay, Totnes, Tottenham, Truro, Tunbridge Wells, University of Hull, Uxbridge, Wandsworth, Warwick, Wellingborough, Wellington, Wimbledon, Winchester, Winchmore Hill, Woking, Worcester, Worthing, Yealand

7.2 UK Area Meetings, equivalent to US Quarterly Meetings (32)

Banbury & Evesham, Bournemouth Coastal, Cambridgeshire, Cornwall, Craven & Keighley, Devon, East Kent, Gloucestershire, Hampshire & Islands, Lancashire Central & North, Leicester, Lincolnshire, London West, Luton & Leighton, North East Thames, North London, North Somerset, North West London, Northamptonshire, Oxford & Swindon, Pendle Hill, Pickering & Hull, Sheffield & Balby, South London, South Wales, Sussex East, Sussex West, West Kent, West Somerset, Wirral & Chester, Worcestershire & Shropshire, York

7.3 UK Recognised Quaker Bodies & Other Quaker Groups (10)

Discovering Quakers, Experiment with Light, Friends Housing Bursary Trust, London Quakers, Quaker Disability Equality Group, Quaker Truth & Integrity Group, Quaker Values in Education, Quakers in South West London, The Edith M Ellis 1985 Charitable Trust, William Gunn's Charity
